**Letter of Destruction regarding personal computers, drives & components**

To Whom It May Concern:

Milwaukee PC uses a downstream recycler for E-waste materials dropped off for disposal at any of our locations. Any assets deemed reusable will have all information removed, with usable drives erased using software to wipe the drive equivalent to NIST 800-88 Level 1 standards. Any assets deemed unusable will be handled and recycled in accordance with current environmental laws.

MPC assumes no liability for data, and recommends customers either securely erase their drives or purchase the secure erasure of each drive for best data destruction.

Sincerely,

Thomas Lison  
E-Waste Coordinator
